RANMORE GLOBAL EQUITY FUND PLC (THE "FUND")

GBP INSTITUTIONAL CLASS (ISIN: IE000WSZ17Z4)

The Fund is managed by Carne Global Fund Managers (Ireland) Limited ("The Manager")

**OBJECTIVES AND INVESTMENT POLICY**

The investment objective of the Fund is to outperform the MSCI World Index (as defined in the Prospectus) ("Index") and to provide capital growth over a medium to long-term time horizon. The Fund is actively managed in reference to the Index as the Fund aims to outperform the Index and its performance is compared to the Index in marketing materials. Investments in the portfolio are not specifically selected from the constituents of the Index, hence the Fund's investment policy is in no way constrained by the extent to which its investments and their weightings differ to its Index and the degree of deviation from the Index may be significant. The selected equities' weightings are derived through a bottom-up investment process rather than through deriving their weightings from the Index. The Fund will invest in shares listed on Recognised Markets in accordance with the requirements of the Central Bank of Ireland and which meet the regulatory criteria (regulated, operate regularly, be recognised and open to the public) and which are listed in the Prospectus. It is not expected that the Fund will have a focus in any particular country or sector.

Essential features of the product which a typical investor should know:

- The Fund will comprise a diversified portfolio of securities of primarily large and mid-sized companies from a range of industry sectors and geographic regions.
- Shares in the Fund may be redeemed on demand, subject to certain restrictions, on each Business Day.

- While the Fund's fundamental investment policy is investment in shares, the Fund may also invest up to 10% of its net assets in investments in financial derivative instruments ("FDI") for efficient portfolio management purposes. The Fund is currently permitted to invest in options for efficient portfolio management purposes.
- The Fund will have discretion to select the shares it will hold, and the Fund aims to outperform the Index.
- The Fund will reinvest any income that it earns from its investments in additional shares/investments.
- The Fund may from time to time hold substantial cash balances.

**Other Information:**

- Investment in the Fund is suitable for investors who expect to maintain their investment over the medium to long-term horizon.
- No currency hedging takes place in any of the share Classes of the Fund. All the Classes of the Fund will derive their currency exposure from the underlying shares held in the portfolio and will not be hedged against its benchmark currency. This creates exposure to currency movements.
- For full investment objectives and policy details, please refer to the section of the Prospectus entitled "Investment Objectives and Policies."

**RISK AND REWARD PROFILE**

The risk category is simulated by displaying the risk category of another share class of the Fund, the USD Investor Class (ISIN IE00B746L328), which is considered not to differ materially in the extent of its participation in the assets of the Fund. The risk category is simulated because the GBP Institutional Class does not have the required performance history to calculate its risk category in accordance with the regulatory methodology.

The Fund is in risk category 6 due to the historic performance of the NAV per share of the USD Investor Class.

- Historical data may not be a reliable indication for the future.
- Risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean "risk free".

Investment in the Fund carries with it a degree of risk (which may change over time) which may not adequately be captured by the risk indicator:

- Market risk - changes in economic conditions can adversely affect the prospects of the Fund.
- Currency risk - the Fund invests in global equities denominated in different currencies, predominantly USD, JPY, EUR and GBP. The underlying currency exposure is not hedged in any of the Classes.
- Operating risks and the risks relating to the safekeeping of assets.
- Custodial risks including safekeeping of assets.
- The Fund's exposure to an instrument or counterparty may be increased as a result of its use of FDI, but such exposure or leverage will not exceed 100% of NAV at any time.

For more details, please refer to the section of the Fund's Prospectus entitled "Risk Factors".
